DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carpenter, in view of Takahashi.

Markovic is relied on to provide evidence.

Carpenter teaches ready-to-eat cereal (i.e. processed cereal food, as in claims 3 and 4) is sweetened (i.e. flavors are enhanced, i.e. quality) with a coating comprising a pectin solution. See the abstract.

Markovic provides evidence that pectin is hetero-polysaccharides, consisting of a linear chain of α -(1-4)-linked D-galacturonic acid, as in claim 2. See the 2nd paragraph of the introduction.

Carpenter fails to teach the pectin is derived from white potatoes, and is silent about it being water soluble as applicants' limitations of claim 1.

Takahashi teaches pectin is derived from white potatoes in hot water (i.e. water soluble). See abstract.

It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of pectin coated cereal, as Carpenter, to include pectin derived from any source known to be functional to provide pectin, such as

white potatoes, as applicants' claimed limitation, because Takahashi teaches use of pectin derived from white potatoes has the benefit of being more flavorful. See abstract.
